

CATO

THE ALL ROUNDER

Design: Matthias Dohm

Cato is the versatile all rounder for a healthy office and desk sharing. It offers customised sitting comfort and, thanks to its finely graduated, patented quick-adjustment mechanism for the counter-pressure of the backrest, adapts to the bodyweight of the respective user in no time.

- Quick adjustment optimal to different weights and body sizes.
- Dynamic sitting improves the oxygen supply to the muscles.
- From the open-plan office to the executive floor: Cato is available with a variety of features, making it suitable for use anywhere in the company.

Klöber Cato ergonomics.

Headrest. Provides support for the neck muscles. Height adjustable by 5 cm; tiltable. Cover in Laif as standard, or in leather for leather upholstery.

4F Arm Supports. Four functions: heightadjustment by 11 cm with horizontal forward movement of 2.5 (+3) cm. Arm supports can be adjusted to each side by 5 cm and by 30° to right and left. In polished aluminium, aluminium-coloured or black. Optionally available with leather finish.

MF Arm Supports. Multifunctional: height-adjustment by 11.5 cm with horizontal forward movement of 8 cm. Arm supports can be adjusted to each side by 5 (+3) cm and by 30° to right and left. Setting can be locked in the respective position. In polished aluminium, aluminium-coloured or black.

3D Arm Supports. Height-adjustment by 10 cm, Arm Supports can be adjusted to each side by 5 cm and by 30° to right and left. Optionally available with leather finish.

Backrest. Height adjustment range 7 cm (6 settings). Adapts quickly and easily for people of different heights.

Lumbar support, depth adjustable by 2 cm. Provides relief for lower back.

Point-synchronised mechanism. Seat/backrest tilt ratio 1:4 for dynamic, natural movement. Discourages a damaging rigid posture. Lockable in three different sitting positions.

Sliding seat, optional. Seat depth adjustable by 5 cm forwards. To suit different leg lengths. Prevents the front seat edge from pressing into the thighs.

Z-armrests. Adjustable by 10 cm in height and about 2.5 cm in depth. Optionally available with leather finish.

Seat tilt. Tilt of -3°. For upright sitting without back curvature, to prevent postural damage.

Patented adjustment of backrest counter-pressure to suit the user's individual body weight: from 45 to 125 kg in 0.5 of a second, thanks to the user-friendly rapid adjustment system.

Coathanger, optional.

Klöber Cato product overview.
